PROFESSIONAL SUMMARY

Automation and Power Platform specialist with a Bachelor's degree in Information Systems (Hons.), Intelligent Systems Engineering, and 2+ years of experience driving digital transformation across Audit, Tax, Advisory, and Risk functions at KPMG Malaysia. Built and maintained 20+ Power BI dashboards and 160+ Power Automate flows automating end-to-end reporting, notifications, and data refresh cycles. Skilled across the Power Platform (Power BI, Power Automate, Power Apps, Power Query, DAX, Dataverse), PowerShell/VBA scripting, and applying machine learning techniques such as LSTM for predictive analytics. Strong grounding in ethical AI practices, cross-functional collaboration, and building scalable, intelligent digital systems.

CORE COMPETENCIES

Automation & Power Platform: Power Automate, Power Apps, Power BI, Power Query, Power BI Dataflow, Dataverse, PowerShell, VBA

Data & Programming: SQL, Python, JavaScript, TypeScript, React, Next.js, R, C++, MATLAB, Google Apps Script

AI & Analytics: Machine Learning, Deep Learning (LSTM), TensorFlow, Synthesia (AI Video Generation), RapidMiner, WEKA, Data Visualization, Data Analytics, AI-Driven Personalization

Other: Workflow Automation, Process Optimization, User Acceptance Testing (UAT), Ethical AI & Data Privacy, Cross-Functional Collaboration, Project Management, LMS Administration

PROFESSIONAL EXPERIENCE

Automation & Digital Associate

KPMG Malaysia, Petaling Jaya, Selangor, Malaysia 08/2024 - Present

- **Power BI:** Designed, developed, and maintained 20+ Power BI dashboards across Audit, Tax, Advisory, Risk, and HR functions, including onboarding trackers, annual risk monitoring, and management/Exco-level reporting, using Power Query for data cleaning/transformation and advanced DAX measures for deeper analytical insights, regularly presented to management and Exco stakeholders.
- **Power Automate:** Developed and maintained 160+ automation flows across all 4 business functions (Tax, Audit, Advisory, Risk), including 100+ flows for report extraction, 30 flows for email notifications, and 30 flows for cloud and desktop source file refresh, significantly reducing manual reporting effort.
- **Data Integration & Power BI Dataflow:** Built automated reporting pipelines using Power BI Dataflow and a centralized Excel source file, integrating SQL databases and Dataverse to consolidate audit course data and enable real-time, cross-platform reporting.
- **Automation Scripting (PowerShell & VBA):** Developed PowerShell scripts to automatically refresh Power Query connections and organize network folder data, and built VBA macros in Excel to automate repetitive reporting tasks, reducing manual processing time.
- **Power Apps:** Implemented a Student Affairs Testimonial Approval System via Power Automate and Power Apps, automating approval workflows and notifications to accelerate approval cycle times and boost stakeholder satisfaction.
- **AI Video Generation (Synthesia):** Developed and produced AI-generated presenter videos using Synthesia for corporate learning and internal campaigns, including the KPMG Care Immersion event, creating multilingual, avatar-based video content without filming and shortening video production turnaround.
- **Data Analytics:** Analyzed learner history reports to identify performance anomalies among individual participants and diagnose root causes, supporting targeted interventions and program improvements.
- **Learning Technology & UAT:** Administered the LMS (scheduling automated reports, tracking learner progress, uploading SCORM-compliant content) and partnered with the Tax team on an 11-module Articulate Storyline 360 eLearning course; conducted User Acceptance Testing with structured stakeholder feedback to enhance functionality and engagement.

Automation & Digital Intern

KPMG Malaysia, Petaling Jaya, Selangor, Malaysia 04/2024 - 07/2024

- **Articulate Storyline:** Assisted in developing interactive e-learning modules, supporting content design and instructional structure.
- **Power Automate:** Supported data tracking and reporting processes, contributing to more efficient reporting workflows.
- **AI Personalization:** Assisted in researching AI-driven content personalization strategies to help optimize digital learning experiences.

Digital Intern
One Syabab, Bandar Baru Bangi, Selangor, Malaysia 09/2021 - 02/2022

- Developed SEO-optimized WordPress landing pages for promotional campaigns, increasing engagement by 10%.
- Designed interactive web elements and digital assets using HTML, CSS, and page builders, enhancing user experience and conversion rates.
- Supported the launch of 5 product landing pages as part of cross-functional marketing campaigns.

KEY PROJECTS

- **Makan Mana – Restaurant Discovery & Decision Web App (Personal Project):** Built and deployed a full-stack Next.js 16 and React 19 web app in TypeScript for choosing where to eat in One Utama, featuring filterable restaurant browsing, an animated spin-the-wheel picker, anonymous ratings and votes, a daily promo watchlist, and crowdsourced submissions; architected the data layer on Supabase Postgres with Row Level Security and aggregate SQL views, styled with Tailwind CSS and shipped as a mobile-first PWA on Vercel.
- **AI Web Office – Multi-Agent LLM Orchestration Platform (Personal Project):** Built a Python-based orchestration platform that decomposes a mission into specialized agent roles (e.g., Solution Architect, Backend Developer, Security Engineer) and executes them with dependency-ordered, concurrent LLM calls via the Claude API; developed both a Flask web dashboard and a terminal-based live dashboard to monitor real-time agent status and hand-offs, plus a cost-free mock mode for testing the full pipeline without API calls.
- **Predicting Electricity Consumption in Residential Buildings Using LSTM (Final Year Project):** Built a deep learning LSTM model in TensorFlow using consumption data collected from two distinct residential house types, deployed via Flask for real-time forecasting, and developed an evaluation dashboard comparing predicted vs. actual consumption across multiple models to monitor performance.
- **IEEE AIET 2025 Conference Publication:** Contributed to paper revision as an additional author in preparation for conference submission and publication, and delivered the official conference presentation.
- **Gamification Platform for KPMG New Joiners – "Business Support Navigator Challenge":** Built a gamified web app that helps new joiners get to know the firm's business support functions through quizzes and challenges; used JavaScript to communicate with Power Automate HTTP request actions, writing responses back into Excel and Dataverse and returning results to the interface, delivering end-to-end interaction with real-time leaderboards, total scores, and progress tracking.
- **AI-Driven Learning Analytics Dashboard:** Built Power BI dashboards integrating SQL, Dataverse, and Dataflows to automate user engagement tracking and course completion analysis.

EDUCATION

Bachelor of Information Systems (Hons.), Intelligent Systems Engineering
Universiti Teknologi MARA (UiTM) Shah Alam | GPA: 3.53 02/2022 - 07/2024

Diploma, Computer Science
Universiti Teknologi MARA (UiTM) Raub | GPA: 3.55 07/2019 - 10/2021

CERTIFICATIONS & AWARDS

- KPMG Inspire Confidence Awards Winner – Q1 2026; IEEE AIET 2025 Conference – Certificate of Presentation; USM Varsity Hackathon 2023
- Frameworks for Developing LLM Agents – Pluralsight; Google Business Intelligence Specialization; Google Data Analytics Specialization; Visually Effective Excel Dashboard – Udemy
